Create matching group

Matching group allows you to group products, it allows to refine your collection selection.

Go to Models > Matching Group

The screenshot shows a web interface for creating a matching group. At the top, there are four tabs: 'Matching groups', 'Models', 'Overrides', and 'Mappings'. The 'Matching groups' tab is selected and underlined. In the top right corner, there is a green question mark icon. Below the tabs, there is a section titled 'GROUP NAME' with a text input field containing the word 'Clothing'. Below this, there is a section titled 'CONDITIONS' with a light blue background. It contains three dropdown menus: the first is 'Collection', the second is 'is equal to', and the third is 'Apparel'. To the right of these dropdowns is a plus sign button. The 'Apparel' dropdown is highlighted with a blue border.

Click on Save Button

Create a Model

Add a new Model

Go to Models > Matching Group

The screenshot shows a web interface with a top navigation bar containing four tabs: 'Matching groups', 'Models', 'Overrides', and 'Mappings'. The 'Models' tab is currently selected and highlighted with a blue underline. Below the navigation bar, there is a section for the 'Amazon.co.uk' matching group, indicated by a UK flag icon and the text 'Amazon.co.uk'. Underneath this, there is a 'Monitors' section with the text 'Computers>Monitor' and an 'Edit' button. The interface is clean and modern, with a light gray background and blue accents.

Click on Add Button

Step 1 – Add Model

Select matching group and product type

Matching groups **Models** Overrides Mappings ?

Model Details

1) **Variation Theme**

If you products have variants, you will select the field/s on Amazon side (1) you want to decline your variants on. If your product don't have variants, skip the step 1 & 2.

2) **Selected variation attribute, here "Size"**

Here you will select the corresponding Options (Shopify Side). If some of your products in the matching group don't have the selected Options fields, they will be created as individual products on Amazon. We chose here the variation theme Size, but many other are possible.

3) **Amazon Attributes (mandatory attributes added by default)**

Amazon attributes will help you to enrich your feed, more you will add attributes, more you will sell because your product sheets will be highly qualified. Some attributes are required and in general they are tagged as "important". If they are not filled, you will get a "Feed Error". Depending on the Amazon Platform (US, EU, UK) some attributes are required for Apparel size data, these attributes are explained for each scenario ahead.

4) **Default values for attributes**

You can map an existing field from Shopify here, and, if it is empty, replace it by the value you will input here.

5) **Product code exemption**

You don't have to fill this part as your product have GTIN (barcodes)

Step 4 – Apparel Size attributes

Attributes are required according to the Product Type selected.

Product Types:

DRESS, SWEATER, KURTA, COAT, TUNIC, SOCKS, UNDERPANTS, SWEATSHIRT, PAJAMAS

Attribute Name	Description
TargetGender	Select the gender for which the product is intended. Valid values: Male, Female, Unisex
AgeRangeDescription	Select the age range for which the product is intended. Valid values: Adult, Big Kid, Little Kid, Toddler, Infant
ApparelSizeSystem	Required. Apparel Size System is used to display marketplace-specific apparel sizes to customers on the site
ApparelSizeClass	Required: Select the class of size representation. Numeric represents values such as numeric_7, numeric_8, numeric_9. Alpha represents values such as one_size, small, xl (X-Large). Age represents values such as 6_months, 2_years.
ApparelBodyType	Conditionally mandatory: Select the applicable body type.
ApparelHeightType	Conditionally mandatory: Select the applicable height type.
ApparelSize	Required: Select the applicable apparel size. Values are dependent on Size Class selection. Only numeric values such as numeric_8, numeric_10, numeric_12 are valid with the numeric Size Class.
ApparelSizeTo	Optional: If providing a range of sizes for a product, select the ending apparel size range value here. Valid selection here should be greater than Apparel Size Value.

Step 4 – Apparel Size attributes

Product Type: SHIRT

Attribute Name	Description
TargetGender	Select the gender for which the product is intended. Valid values: Male, Female, Unisex
AgeRangeDescription	Select the age range for which the product is intended. Valid values: Adult, Big Kid, Little Kid, Toddler, Infant
ShirtSizeSystem	Required: Size System is used to display marketplace-specific apparel sizes to customers on the site.
ShirtSizeClass	Required: Select the class of size representation. Numeric represents values such as numeric_7, numeric_8, numeric_9. Alpha represents values such as one_size, small, xl (X-Large). Age represents values such as 6_months, 2_years.
ShirtBodyType	Conditionally mandatory: Select the applicable body type.
ShirtHeightType	Conditionally mandatory: Select the applicable height type.
ShirtSize	Required: Select the applicable size. Values are dependent on Size Class selection. Only numeric values such as numeric_8, numeric_10, numeric_12 are valid with the numeric Size Class.
ShirtSizeTo	Optional: If providing a range of sizes for a product, select the ending apparel size range value here. Valid selection here should be greater than Apparel Size Value.
ShirtNeckSize ShirtNeckSizeTo	Conditionally mandatory: Fill only when ShirtSizeClass is selected as neck or neck_sleeve
ShirtSleeveLength ShirtSleeveLengthTo	Conditionally mandatory: Fill only when ShirtSizeClass is selected as neck_sleeve

Step 4 – Apparel Size attributes

Product Type: PANTS, SHORTS, OVERALLS

Attribute Name	Description
TargetGender	Select the gender for which the product is intended. Valid values: Male, Female, Unisex
AgeRangeDescription	Select the age range for which the product is intended. Valid values: Adult, Big Kid, Little Kid, Toddler, Infant
BottomsSizeSystem	Required: Size System is used to display marketplace-specific apparel sizes to customers on the site.
BottomsSizeClass	Required: Select the class of size representation. Numeric represents values such as numeric_7, numeric_8, numeric_9. Alpha represents values such as one_size, small, xl (X-Large). Age represents values such as 6_months, 2_years.
BottomsBodyType	Conditionally mandatory: Select the applicable body type.
BottomsHeightType	Conditionally mandatory: Select the applicable height type.
BottomsSize	Required: Select the applicable size. Values are dependent on Size Class selection. Only numeric values such as numeric_8, numeric_10, numeric_12 are valid with the numeric Size Class.
BottomsSizeTo	Optional: If providing a range of sizes for a product, select the ending apparel size range value here. Valid selection here should be greater than Apparel Size Value.
BottomsWaistSize	Valid Waist & Inseam representation format is: (waist_value)W x (inseam_value)L
BottomsInseamSize	Inseam sizes can be added in combination with Waist or alpha sizes.
